## About Me

As a full-stack web developer, I have strong expertise in front-end and back-end development, and experience in web design, server setup, domain configuration, and server management. I am highly adaptable, always eager to learn new technologies, and passionate about creating efficient, user-friendly web solutions. My ability to manage both development and server-related tasks ensures seamless project execution from start to finish.

## Projects

- MNHS | LMS**  
<https://github.com/lmalleri/mnhs-lms-mern> 2024
  - A platform for managing and delivering online courses with user accounts, course tracking, PostgreSQL database, admin dashboard, and interactive features.
  - Backend Developer for the project, responsible for utilizing Node.js, Express.js, and PostgreSQL.
- Baumann Fit Box**  
<https://baumannfitbox.site> 2024
  - A modern WordPress website showcasing a gym in Tagaytay, highlighting its services, facilities, and fitness offerings.
  - As one of the WordPress Developers for the project, I managed the theme and plugins, and refined site functionality to ensure seamless operation.
- The Angelite**  
<https://theangelite.net> 2025
  - Developed a responsive WordPress site for The Angelite, Holy Angel University's official student publication, to effectively showcase journalistic content and campus stories.
  - Customized theme and plugin functionalities to support editorial workflows, improve content accessibility, and enhance overall site performance.
- InternStreet**  
<https://github.com/ru-wel/internstreet-cloudcom> 2025
  - A full-stack web platform designed to connect students in the Philippines with internship opportunities tailored to their location and field of interest.
  - Developed and maintained core backend features such as user authentication, internship application tracking, and an admin dashboard with analytics and logs.
